

## ACCEPTABLE MATERIALS WORKSHEET

MRF: \_\_\_\_\_

CITY: \_\_\_\_\_ DATE: \_\_\_\_\_

This worksheet serves to ensure that local programs and MRFs remain on the same page regarding acceptable and problematic materials. Use this document to identify and address issues, inform front line staff, and create materials to educate residents. It is recommended that the local program representative and MRF representative complete this worksheet together every 6 months and during the creation or renewal of processing contracts. We encourage this document be used in the RFP process as well.

When creating educational materials, use this document to understand the ins and outs of acceptable items, then create broader categories, images, and definitions to inform residents.

Please go through the entire worksheet and mark whether each item is acceptable or not acceptable. You will see two categories under the "Do Not Accept" column. Here is how they are defined:

**Non-detrimental:** Item is not sent to a market for recycling, but does not cause any major problems if found in the stream.

**Detrimental:** Item can shut down or damage equipment, harm employees, and/or substantially degrade the value of material.

## PROHIBITIVE ITEMS

If you could tell residents to leave five items out of their recycling streams, which items would you choose?

Rank the top five (5) unacceptable items that are causing the most problems in your facility (i.e. degrading other commodities significantly, causing damage to MRF equipment, presenting danger to staff, becoming high volume residual). Please rank with numbers "1" through "5." Put a "1" in the box of the worst contaminant. Only rank the top five and leave everything else blank.
